SUMMARY

Software Engineering enthusiast with hands-on experience in building scalable web and mobile applications, and a growing focus on AI/ ML and cloud-based solutions. Strong foundation in software engineering principles, system design, and problem-solving, with practical exposure to modern development tools and architectures. Passionate about leveraging data, automation, and cloud technologies to solve real-world problems. Eager to continuously learn, embrace technical challenges, and contribute to innovative, growth-oriented engineering teams.

EDUCATION

B.Sc. (Hons) Information Technology (Specializing in Software Engineering) 2022 – 2026
Sri Lanka Institute Of Information Technology(SLIIT)

General Certificate of Education (Advanced Level), Physical Science 2009 – 2021
Prince of Wales College

PROFESSIONAL EXPERIENCE

Intern - Full Stack Developer 06/2025 – 01/2026
FinTech Hive Nugegoda, Sri Lanka

- Developed responsive and interactive frontend interfaces using **React.js, JavaScript, and Tailwind CSS**.
- Contributed to backend development using **Python and Go (Golang)**, working on API development, business logic, and application functionality.
- Contributed to the development and enhancement of the **Cleveri ERP System**, supporting frontend and backend functionality.
- Developed identity verification and facial recognition workflows for **VerifiBee**, a digital identity verification platform used for SIM registration and verification.
- Implemented and configured email management modules to support application communication workflows.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, PHP

Frontend: React.js, React Native, Tailwind CSS, Flutter

Backend: Node.js, Express.js, Spring Boot, FastAPI, REST APIs

Databases: MongoDB, MySQL

AI/ML: Machine Learning, Deep Learning, NLP

Cloud: AWS

Tools: Git, Docker, Jira, Bitbucket

SOFT SKILLS

Leadership, Teamwork, Public Speaking, Analytical Thinking , Strategic Planning

CERTIFICATES

Productivity with Generative AI
issued by Microsoft

Programming in Python
issued by University Of Moratuwa

AWS Introduction to Amazon S3
Issued by AWS

Career Essentials in Business analyst
issued by Microsoft & LinkedIn

LANGUAGES

- Sinhala(Native)
- English(Fluent)

PROJECTS

Suwa Manasa – AI-Powered Mental Wellness Mobile Application
Contributed to the development of a children's mental wellness platform using **Python, FastAPI, Flutter, MongoDB, and AI/ML technologies**. Designed and implemented a **Sinhala voice-first mood prediction system** with automated parent notification functionality, leveraging **XLM-RoBERTa**, speech-to-text processing, and real-time mood analysis, achieved approximately **96% mood prediction accuracy**.

DevFlow AI – AI-Powered Project Management Platform (React, Node.js, Express.js, Prisma, PostgreSQL, Redis, BullMQ, Gemini AI)
Built a full-stack platform for managing workspaces, projects, team members, and tasks with role-based access control. Implemented secure JWT authentication, RESTful APIs, AI-powered productivity features using Gemini AI, and asynchronous background job processing with Redis and BullMQ. Developed a machine learning service using Python and FastAPI to support intelligent task insights and productivity analysis.

CineMatch-Movie Recommendation System(React.js, FastAPI, Python, scikit-learn, TMDB API)
Built an individual full-stack movie recommendation application using a machine learning content-based filtering model to generate personalized recommendations. Developed RESTful APIs with FastAPI, integrated TMDB for real-time movie metadata, implemented features such as intelligent search, recommendation history, favorites, watchlist, and activity dashboard, and deployed the application using Render and Vercel.

AI Travel Planner — (React Native Expo, Firebase, Google Places API, Gemini API)
Developed individually, this mobile app lets users search destinations, set travel preferences, and instantly generate AI-driven itineraries (hotels, flights, activities) with an intuitive UI, real-time data handling, and seamless API integrations.

Jobify - Job Tracking Web Application(MERN Stack)
Built an individual project using the MERN stack to help users log and monitor job applications. Designed features to track progress, set reminders, and view analytics. This project enhanced my skills in full-stack development, particularly in building RESTful APIs, managing databases, and creating responsive user interfaces. I also improved my understanding of integrating front-end and back-end systems and implementing scalable solutions

PUBLICATIONS

AI-Powered Mobile Application for Supporting Mental Wellness in Children
IEEE
Published in the IEEE Xplore Digital Library following acceptance to the 2026 11th IEEE International Conference on Automatic Control and Intelligent Systems (I2CACIS 2026). This publication presents an AI-powered mobile application for supporting children's mental wellness through multimodal emotion analysis and responsible AI technologies.
