SUMMARY

Software Engineering enthusiast with hands-on experience in building scalable web and mobile applications, and a growing focus on AI/ ML and cloud-based solutions. Strong foundation in software engineering principles, system design, and problem-solving, with practical exposure to modern development tools and architectures. Passionate about leveraging data, automation, and cloud technologies to solve real-world problems. Eager to continuously learn, embrace technical challenges, and contribute to innovative, growth-oriented engineering teams.

PROFESSIONAL EXPERIENCE

Intern - Full Stack Developer

FinTech Hive

06/2025 – 01/2026
Nugegoda, Sri Lanka

Gained hands-on experience in **React.js, JavaScript, Tailwind CSS, and Python** for enterprise software development. Contributed to the **Cleveri ERP System** and **VerifiBee Digital Identity Verification Platform**, developing responsive user interfaces, implementing identity and face verification workflows, configuring email management modules, and collaborating with cross-functional teams to deliver production-ready solutions

EDUCATION

B.Sc. (Hons) Information Technology (Specializing in Software Engineering)

Sri Lanka Institute Of Information Technology (SLIIT)

2022 – Present

General Certificate of Education (Advanced Level), Physical Science

Prince of Wales College

2009 – 2021

SKILLS

Problem-Solving

Developed efficient solutions in programming projects.

AI Collaboration

Collaborated with AI tools to develop better solutions efficiently

Adaptability

Quickly learned new programming languages and frameworks.

Team Collaboration

Collaborated with team members on various coding assignments.

CERTIFICATES

Productivity with Generative AI

issued by Microsoft

Career Essentials in Business analyst

issued by Microsoft & LinkedIn

LANGUAGES

• Sinhala (Native)

• English (Fluent)

PROJECTS

Suwa Manasa – AI-Powered Mental Wellness Mobile Application

Contributed to the development of a children's mental wellness platform using **Python, FastAPI, Flutter, MongoDB, and AI/ML technologies**. Designed and implemented a **Sinhala voice-first mood prediction system** with automated parent notification functionality, leveraging **XLM-RoBERTa**, speech-to-text processing, and real-time mood analysis, achieving **96% prediction accuracy**

AI Travel Planner — React Native Expo, Firebase, Google Places API, Gemini API

Developed individually, this mobile app lets users search destinations, set travel preferences, and instantly generate AI-driven itineraries (hotels, flights, activities) with an intuitive UI, real-time data handling, and seamless API integrations.

ShoppingEye — Spring Boot , Java, React.js, MySQL, Docker ,Spring Security

Collaborated on a team to build a shopping mall web app, implementing cart functionality for efficient item management with a React.js frontend (Redux for state, Axios for API calls), Spring Boot–based REST APIs (secured via JWT and Spring Security), and MySQL storage. The app is containerized with Docker for consistent environments strengthening API integration, state management, security

Jobify - Job Tracking Web Application(MERN Stack)

Built an individual project using the MERN stack to help users log and monitor job applications. Designed features to track progress, set reminders, and view analytics. This project enhanced my skills in full-stack development, particularly in building RESTful APIs, managing databases, and creating responsive user interfaces. I also improved my understanding of integrating front-end and back-end systems and implementing scalable solutions

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, PHP

Frontend: React.js, React Native, Tailwind CSS, Flutter

Backend: Node.js, Express.js, Spring Boot, FastAPI, REST APIs

Databases: MongoDB, MySQL

AI/ML: Machine Learning, Deep Learning, NLP

Tools: Git, Docker, Jira, Bitbucket
